

Environmental Club

The environmental club is composed of a group of students interested in making our school more environmentally friendly and sustainable. Our first goal is to allocate funds towards purchasing another energy efficient water filter system, encouraging students to bring their own renewable water bottles rather than purchasing more throw away plastic water bottles. Our second goal is to research and develop a system for compost in our school. In 2020, every individual and group facility will be mandated to compost, so we want to explore and jump-start our school towards composting, reducing the amount of compost that we have. Any students interested should talk to Mrs. Cochran or Mrs. Wilson. Our meetings are on Tuesdays during H-block A in Room 115 (Mrs. Wilson's Room.)
